- FIPS Compliant design with AES256-bit XTS Hardware Encryption
- Brute Force Anti-Hacking Self Destruction
- Inactivity Autolock
- Read Only Mode
- Bootable Drive

FEATURES

HOST OS INDEPENDENT

The SecureDrive® BT will work with any OS. There are no drivers or software to update; all encryption and authentication are performed directly on the drive.

WIRELESS USER-AUTHENTICATION

Connect wirelessly to your hard drive via smart phone/tablet (Android/Apple) or Apple Watch with full disk AES256-bit XTS hardware encryption.
REMOTE WIPE

The SecureDrive® BT is the only hardware encrypted portable drive that can be remotely wiped with a unique command in the event that it is lost or stolen.

STEP-AWAY AUTOLOCK

The Step-away Autolock locks the drive when the iOS/Android device is moved about 10 ft away from the drive for longer than 5 seconds.
SLIM SECUREDRIVE® DESIGN

At 12.5mm, the SecureDrive® is the thinnest portable hardware encrypted hard drive on the market.

REMOTE MANAGEMENT READY

The SecureDrive® BT can be remotely managed via Web Console that allows Admins to control where and when the drives can be accessed with Geo-Fencing and Time-Fencing. Additional features include remote unlock, change password, remote wipe, or disable access even if the user has set a password.
