SecureDrive BT

Quick Start Guide

Welcome to SecureDrive™ BT Model, our app-operated, hardware encrypted, external portable storage that's OS-independent. It's controlled via smartphone (iOS, Android).

1. Installing the App

Download and install the "DataLock" App from either Apple's App Store or Google Play.

CAUTION: Risk of loss of data. If you forget your password, all data will be inaccessible and reformatting will be required.

Red LED is ON, solid	The drive is locked, or may indicate procedure failed
Red LED is blinking	Locked or ready for input
Green LED is ON, solid	Drive is unlocked

Represents the icons in the app

2. Adding the Drive to the App (Pairing)

- A. Connect the Drive to a computer with the USB cable.
- B. Start the app, tap the Drive name and follow the on-screen instructions.

3. Unlocking the SecureDrive-BT

With the app running, after tapping the drive name:

A. Enter password (the factory preset 11223344

B. Tap unlock.

Changing the Password

- A. Tap the desired drive name.
- B. Tap Change Password and enter your current password.
- C. Enter your new password (see requirements below) and then retype it into the Conf rm f eld.
- D. Tap Change Password.

PASSWORD REQUIREMENTS

- 7-15 digits, special characters okay
- Cannot all be the same number/letter or consecutive numbers/letters.

Disconnecting and Locking

Unplug the cable—the Drive locks automatically. Generally, ejecting it first is not necessary. To lock the Drive without unplugging it, swipe the Drive name left and tap Lock.
