ABOUT GATEWORX

Gateworx:

Regional Expertise. Global Cybersecurity. Unmatched Commitment.

Gateworx is a pioneering Egyptian ICT provider driving digital transformation across the Middle East. Since 2005, we've consistently delivered cutting-edge solutions in cybersecurity, business applications, and managed services, fueling growth for enterprises and government sectors alike.

As a trusted value-added distributor, we combine deep market expertise with visionary leadership bridging global technology providers with regional market needs. Our approach is rooted in innovation, agility, and measurable impact, empowering our partners to achieve operational excellence and sustainable growth.

By harnessing the power of artificial intelligence, advanced cybersecurity frameworks, and strategic digital enablement, we don't just deliver technology—we enable outcomes. Our reputation for excellence, sustained by over five years as a top-tier distributor, is built on our unwavering commitment to partnership, performance, and long-term value creation.

A WINNING TEAM

At Gateworx,

At Gateworx, we serve as a Value Added Distributor, bridging the gap between global vendors and the specific needs of local markets. Our deep-rooted presence and successful track record in the region stem from a strong commitment to building and maintaining a robust partner network.

We've made significant investments in top tier resources to support our partners and their customers whenever and wherever needed. Our comprehensive platform includes technical support, pre-sales expertise, and strategic consultation.

This framework has already been successfully deployed in Egypt and across key Middle Eastern markets including KSA, UAE, Sudan, and Libya.

SPEED TO

VALUE

Gateworx accelerates time-to-value through a proven, high-quality implementation process.

We leverage standardized, repeatable methods and advanced tools to ensure efficient, effective solution deployment driving high customer satisfaction.

Our collaborative, staged approach reduces risks, enhances ROI, and minimizes variability.

Vendor Value: Productivity and efficiency are top priorities for today's businesses but achieving them takes more than ambition. We help our partners define measurable goals, analyze performance, and implement clear strategies for continuous improvement. With Gateworx, you gain the tools and insight needed to enhance productivity and drive success.

STRATEGY

Our mission is to deliver high-quality, cost-effective solutions tailored to local market demands. We achieve this through a structured, multi-phase strategy:

- 01** Deep market analysis to understand customer needs.
- 02** Rigorous vendor evaluation and selection based on quality and relevance.
- 03** Investment in product expertise and logistical capabilities.
- 04** Building and maintaining high-performing partner networks to deliver optimal service.

This approach ensures that every solution we deliver is aligned with the highest standards and truly serves the needs of our customers.

COMMITMENT TO SUCCESS

We're committed to the success of our partners. By sharing our expertise and providing continuous support, we empower our partners to grow their business and achieve their goals.

Our partner and reseller programs are tailored to meet individual objectives and potential.

At Gateworx, every partner has a unique path and we're here to guide them toward success.

INDUSTRY KNOWLEDGE VALUE

Every business is unique and so are our solutions. At Gateworx, we begin by truly understanding your needs and objectives. Our work isn't done until we've delivered measurable value that drives results. We are committed to delivering cybersecurity solutions that empower both people and businesses standing firm on our promises and our performance.

DEPLOYMENT

Our deployment services cover the full lifecycle of software and hardware implementation ensuring your systems are installed, configured, tested, and optimized to perform reliably in your environment. From day one, we handle the technical complexity so you can stay focused on your goals.

IT & BUSINESS CONSULTING SERVICES

Leveraging the expertise of our seasoned consultants, we offer strategic IT and business consulting tailored to your digital transformation journey.

We help clients evaluate the right technologies and methodologies, aligning them with operational goals to enhance network strategies and business performance.

These services support your IT initiatives with strategic, architectural, and operational planning delivering actionable insights for efficient and secure network implementations.

SOPHOS

 **SharkStriker**

SOPHOS

www.gateworx.net

ABOUT SOPHOS

Sophos: Unified Cybersecurity. Intelligent Protection. Trusted Worldwide.

Sophos is a global cybersecurity leader, protecting over 500,000 organizations and millions of users in more than 150 countries. With a legacy of nearly three decades, Sophos continues to deliver powerful, AI-driven solutions that simplify cybersecurity while defending against the most sophisticated threats.

From advanced endpoint protection and firewalls to secure email, server, and mobile device security, Sophos provides a comprehensive portfolio of next-generation defenses all unified through Sophos Central, its cloud-native management and analytics platform.

SOPHOS

SOPHOS CYBERSECURITY ECOSYSTEM:

INTEGRATED. INTELLIGENT. UNCOMPROMISING.

Sophos delivers a unified cybersecurity architecture designed to secure every facet of today's hybrid environments.

Its comprehensive product portfolio combines industry-leading innovation with seamless interoperability, enabling organizations to prevent, detect, and respond to threats with unmatched precision all centrally managed via Sophos Central, the cloud-native command center for complete visibility and control.

CORE SOLUTIONS INCLUDE:

01 Intercept X Endpoint & Server Protection

Advanced multilayered defense powered by deep learning AI, anti-ransomware, exploit prevention, and Extended Detection & Response (XDR).
Delivers best in class protection for workstations and servers on premises or in the cloud.

02 Sophos Firewall (XGS Series)

Next-generation firewalls offer intelligent traffic shaping, high-performance deep packet inspection, SD-WAN, and synchronized security with Sophos endpoints for coordinated defense and real-time threat response.

03 Sophos XDR & MDR Services

Gain full-spectrum visibility and 24/7 expert-driven threat hunting. Sophos XDR extends protection across endpoint, server, firewall, email, and cloud workloads, while MDR provides fully managed detection and response by a global team of cybersecurity experts.

Zero Trust Network Access (ZTNA)

A modern, secure VPN alternative, ZTNA enforces adaptive access controls to ensure users only connect to what they need reducing the attack surface and improving access efficiency.

05 Network Detection & Response (NDR) and Sophos Switch

Sophos NDR detects lateral movement and advanced threats often missed by traditional tools. Combined with high-performance network switches, Sophos delivers complete edge-to-core visibility and control.

06 Secure Email & Phish Threat

Protects communication with AI-based email security, anti-spam, and anti-phishing enhanced by simulation training to reduce human error and elevate organizational cyber awareness.

07 Sophos Mobile & SafeGuard Encryption

Unified Endpoint Management (UEM) for mobile devices and robust full-disk and file-level encryption ensure secure, policy-driven access to corporate data anywhere, on any device.

TOGETHER,

these solutions form a cohesive defense ecosystem adaptive, automated, and intelligent empowering organizations to stay ahead of evolving threats while simplifying security operations at scale

proofpoint.[®]

ABOUT PROOFPOINT

Proofpoint: People-Centric Cybersecurity. Trusted by the World's Leading Organizations.

Proofpoint is a global cybersecurity leader focused on protecting people the most targeted part of any organization from advanced threats and compliance risks. With a deep understanding of how attacks originate, Proofpoint delivers an integrated suite of cloud-based solutions that safeguard email, web, cloud accounts, and sensitive data across today's digital landscape.

Serving more than half of the Fortune 100, Proofpoint helps organizations defend against threats such as phishing, business email compromise (BEC), ransomware, insider threats, and data loss. Its cutting-edge solutions combine threat intelligence, behavioral analytics, and automation to deliver precise, real-time protection and actionable insights.

At the core of Proofpoint's mission is a people-centric approach because stopping threats starts with protecting the individuals who are most vulnerable. With multilayered security controls, industry-leading threat intelligence, and advanced data protection capabilities, Proofpoint empowers businesses to detect, prevent, and respond to both internal and external cyber threats.

Whether it's securing remote workforces, ensuring compliance, or enhancing user awareness, Proofpoint delivers the clarity and control organizations need to stay resilient in an evolving threat environment.

ABOUT PROOFPOINT ESSENTIALS

Enterprise-Grade Email Security for Small and Medium-Sized Businesses

Proofpoint Essentials delivers robust, cloud-based email security solutions specifically designed for small and medium-sized enterprises (SMEs). Leveraging the same advanced threat intelligence and infrastructure trusted by over 75% of Fortune 100 companies, Proofpoint Essentials provides comprehensive protection against a wide array of email-based threats.

CORE SOLUTIONS INCLUDE:

01

Advanced Threat Protection

Safeguards against spam, phishing, ransomware, and business email compromise (BEC) attacks using multi-layered detection engines and AI-driven analysis

02

Data Loss Prevention (DLP) and Email Encryption

Ensures sensitive information is protected through policy-driven DLP and automated encryption, maintaining compliance and data integrity.

05

User-Friendly Management

Features an intuitive interface with per-user controls and quarantine access, simplifying administration and enhancing user experience.

03

Email Continuity

Provides a 24/7 emergency inbox to maintain uninterrupted email access during server outages or disruptions.

04

Cloud-Based Archiving

Offers secure, searchable email archiving with e-discovery capabilities, facilitating compliance and information governance.

SECURITY AWARENESS TRAINING

EMPOWER USERS TO BE THE FIRST LINE OF DEFENSE

Proofpoint Essentials includes a robust Security Awareness Training program that helps small and medium-sized businesses turn their employees into active participants in cybersecurity defense. Key features of this training include

01 Simulated Phishing Attacks

Realistic phishing simulations to test and improve user responses in a safe environment.

02 Engaging Training Modules

Interactive, bite-sized lessons covering critical topics such as phishing, password hygiene, and data protection.

03 Behavioral Insights

Actionable reports and analytics that help administrators track risk levels and assess the effectiveness of training across the organization.

04 Localized Content

Multilingual support, including Arabic-language options, to ensure users receive training in the language and cultural context that best suits them

SECURITY ASSESSMENT

Proactive Protection with Comprehensive Security Reviews

In addition to training, Proofpoint Essentials offers Security Assessments to identify vulnerabilities and ensure optimal protection against email-based threats. These assessments help businesses understand their current security posture, pinpoint weaknesses, and implement tailored solutions to safeguard against cyberattacks.

By fostering a security-conscious workforce and providing actionable insights, Proofpoint Essentials helps reduce human error the leading cause of data breaches while strengthening defenses with educated, vigilant users.

SharkStriker

ABOUT SHARKSTRIKER

Global Cybersecurity. Localized Intelligence. Total Protection.

SharkStriker is a global cybersecurity services provider headquartered in the US, operating cutting-edge Security Operations Centers (SOCs) across the globe. We function as an extension of your in-house cybersecurity team not just managing security but transforming your entire cyber defense strategy.

Our mission is to help organizations maximize their cybersecurity ROI by offering proactive, AI-driven, and fully managed solutions. With a holistic and modular approach, SharkStriker empowers enterprises to gain complete visibility, control, and protection across their IT environments.

OUR CORE PILLARS:

01 360° Visibility

End-to-end monitoring across your infrastructure to detect, analyze, and respond to threats in real time.

02 Integrated Security

Unified solutions that combine MDR, XDR, Next-Gen SIEM, and Network Security under a single, intelligent SOC.

03 AI-Powered Automation

Accelerate response times with advanced automation capabilities powered by AI/ML, streamlining threat remediation and incident handling.

SHARKSTRIKER SERVICES PORTFOLIO

SharkStriker offers a wide range of cybersecurity services designed to address today's most complex and dynamic threat landscapes

01 **Managed Detection and Response (MDR)**

Proactive, continuous monitoring and real-time threat protection supported by AI-backed incident remediation, ensuring minimal downtime and maximum threat containment.

02 **Extended Detection and Response (XDR)**

Enterprise-grade detection capabilities with cross-vector correlation, AI-enhanced analytics, and 360° security posture visibility all managed through our centralized platform.

03 **Managed Next-Gen SIEM**

Gain complete insights into network, application, and user activity. Our SIEM solution enables faster, smarter decisions with behavior-based analysis and threat correlation.

04 **Vulnerability Assessment & Penetration Testing (VAPT)**

Thorough assessments across mobile, API, IoT, web apps, and networks to identify and remediate exploitable vulnerabilities and reduce threat exposure.

05 Compliance & Risk Management

Ensure compliance with critical regulatory frameworks such as GDPR, PCI-DSS, HIPAA, and ISO 27001 through tailored consulting and managed solutions.

06 Firewall Management

Full-spectrum firewall services including audits, deployment, rule optimization, and ongoing health monitoring to enforce robust network security.

07 Cloud Security

Secure your cloud environments whether AWS, Azure, or GCP with real-time visibility, identity protection, workload security, and misconfiguration management.

Why SharkStriker?

01 Global SOC Presence

Around-the-clock defense with 24/7 managed services.

02 AI-Driven Security

Use of artificial intelligence and machine learning to identify patterns and prevent breaches

05 Multilayered Protection

From detection to response, we cover the full lifecycle of cybersecurity operations.

03 Vendor-Neutral Approach

We work across a broad ecosystem of technologies to ensure optimal integration and ROI.

04 Scalable for All

Whether SMBs or large enterprises, our services scale to meet the needs of any organization.

ORCA APPROACH

Sharks are scared of the Great Whale or Orca.
Think of the cyber threats your organization faces as sharks.
Our ORCA approach uses an adversarial mindset delivering all-around protection to your organization. ORCA is a unique cyber Security solution that centers on the ORCA approach, technology experts and rests on the following pillars:

OBSERVE

Collect, Store, Detect, Analyze and Visualize the Cyber Security Attack

COMPLIANCE

Security controls to stay compliant with PCI-DSS, GDPR, HIPPA, NIST

RESPONSE

Incident Investigation and Machine-Accelerated Automated Responses

AWARENESS

Build Cyber Security Culture by raising the awareness in the organization
